Correction of: <https://publichealth.jmir.org/2022/3/e32694>

(*JMIR Public Health Surveill* 2022;8(5):e39498) doi: [10.2196/39498](https://doi.org/10.2196/39498)

In “The Transition of Social Isolation and Related Psychological Factors in 2 Mild Lockdown Periods During the COVID-19 Pandemic in Japan: Longitudinal Survey Study” (*JMIR Public Health Surveill* 2022;8(3):e32694) the authors noted one error.

In Table 2 of the originally published article, the standard deviations of the PHQ-9 in phases 1 and 2 in the ‘Persistent-SI’

group were missed. The table was originally published as shown in [Multimedia Appendix 1](#).

The 2 SD values were 5.93 and 6.07, respectively, and the corrected Table 2 is as follows:

Table 2. Differences and interactions between phases^a and transition of SI^b on different scales.

Phase	Mean score (SD)				Effect of phase			Effect of group			Interaction		
	No SI	Improved SI	Worsened SI	Persistent SI	<i>F</i> (<i>df</i>)	<i>P</i> value	η_G^2 ^c	<i>F</i> (<i>df</i>)	<i>P</i> value	η_G^2	<i>F</i> (<i>df</i>)	<i>P</i> value	η_G^2

^aPhase 1: between May 11 and 12, 2020, in the final phase of the first state of emergency; phase 2: between February 24 and 28, 2021, in the final phase of the second state of emergency.

^bSI: social isolation.

^c η_G^2 : 0.010, small; 0.060, medium; 0.140, large.

^dLSNS-6: Lubben Social Network Scale (shortened version).

^eN/A: not applicable.

^fUCLA-LS3: University of California, Los Angeles (UCLA) Loneliness Scale, Version 3.

^gK6: Kessler Psychological Distress Scale-6.

^hPHQ-9: Patient Health Questionnaire-9.

The correction will appear in the online version of the paper on the JMIR Publications website on May 16, 2022, together with the publication of this correction notice. Because this was made after submission to PubMed, PubMed Central, and other full-text repositories, the corrected article has also been resubmitted to those repositories.
