Dosage information known	123 (28%)	35 (35%)	31 (24%)	189 (28%)
<i>I've been using 75mg of venlafaxine, 25mg 5-htp, and 150mg bupropion twice daily the last few days. I took those things maybe 5 hours ago. An hour later I used 175mg ...</i>				
Nonmedical use- encouraging	54 (12%)	10 (10%)	14 (11%)	78 (12%)
<i>... maybe like a combo of cocaine and adderall without the paranoia or hot flashes..... Did find myself wanting to do it again and try increased dose..... Try it once yourself and see....</i>				
Nonmedical use- discouraging	178 (41%)	22 (22%)	24 (18%)	224 (34%)
<i>"I am sharing what happened so other won't do this. I took 800 mg andI went into convulsions! I could have died. Please PLEASE don't ever abuse Antidepressants"</i>				
Neither nonmedical use-discouraging or encouraging-- a classification of "neither" was assigned if a post was both encouraging and discouraging	68 (16%)	19 (19%)	28 (22%)	115 (17%)
<i>bupropion is sometimes referred to as crack so I would strongly suggest not mixing the two. This could cause seizure. However, you can have effects from snorting—it burns like h***. People have told me its better than adderal and they have abused it for a long time.</i>				
Procurement method mentioned (obtained or stolen from third party, illegal purchase, prescribed by health care provider, other)	38 (9%)	13 (13%)	11 (8%)	62 (9%)

Drugs combined for misuse/nonmedical use	72 (16%)	40 (40%)	27 (21%)	139 (21%)
<i>...haven't tried amitriptyline before but I got access to 75mg pills, that I would probably cut in half or something since i've never done before. I know they're for sleep, but what if I mixed with a cocktail of kpin and cipralelex/lexapro.....</i>				
Mention of magnitude of misuse/nonmedical	112 (26%)	17 (17%)	11 (8%)	140 (21%)

use within community				
<i>Hopeful that someone experienced with this might reply. It's becoming quite popular in my area. My drug of choice is crack, but these pills [bup] are cheap & easy to come by...</i>				
Mention of use within the criminal justice system	19 (4%)	4 (4%)	0 (0%)	23 (3%)
<i>another drug abused in the big house is Wellbutrin (bupropion), snorted for its stimulant effects...</i>
